### A thread by [Ketan Joshi](#)

OKAY everyone, look here. It is time for a mega-thread of just the nastiest, shittiest, most planetarily destructive things that the Australian government has done over the past 3 yrs.

There will be swears. Tears. Charts. Articles. And I'll add to it as we get closer to May 21

Sections I'll be covering

- Greenwashing and tricks
- Fossil expansionism
- Delay, obstruction and denial of transition
- Other / just, the batshit wildest most bonkers things that we've somehow lived through

## GREENWASHING

The gov't falsely declares their projections show 2030 emissions will be 35% below 2005 levels. How they did it: just deadass changed the assumption in the spreadsheet to get a higher number. No shame

It worked: the # is constantly repeated

**Ketan Joshi** 

@KetanJ0 · [Follow](#)

The Australian government keeps saying that its own projections show a 35% drop in emissions by 2030 (relative to 2005).

It's a lie. I will quickly explain how it's crafted, because it's really important.

Time, my friends, for a 'lil thread

**Ketan Joshi**  @KetanJ0

Replying to @KetanJ0

If the projects really do predict a 35% drop, it'll be the largest change in revised 2030 emissions though. what a mystery

## GREENWASHING

Before their projections included renewable growth, they has to claim “over-performance” on old targets to ‘carryover’ into Paris.

Just like avoided deaths from the first wave of COVID means you are allowed to kill more people for 2nd wave

[.reneweconomy.com.au/morrison-infu...](https://reneweconomy.com.au/morrison-infu...)

## GREENWASHING

As above, projections were showing Aus would miss weak 2030 targets. Solution: they flat-out lied and said they were going to ‘meet and beat’ them.

Result: repeated uncritically across media for years and years and years

**Angus Taylor MP** ✓

@AngusTaylorMP · [Follow](#)

Labor still don't have any answers. Meanwhile, we're getting on with meeting and beating our targets.

[#auspol](#) [@Tony\\_Burke](#)

**News Breakfast** ✓ @BreakfastNews

Labor's Tony Burke has attacked the Coalition's policy on emissions reductions and climate change, saying "they need to act".

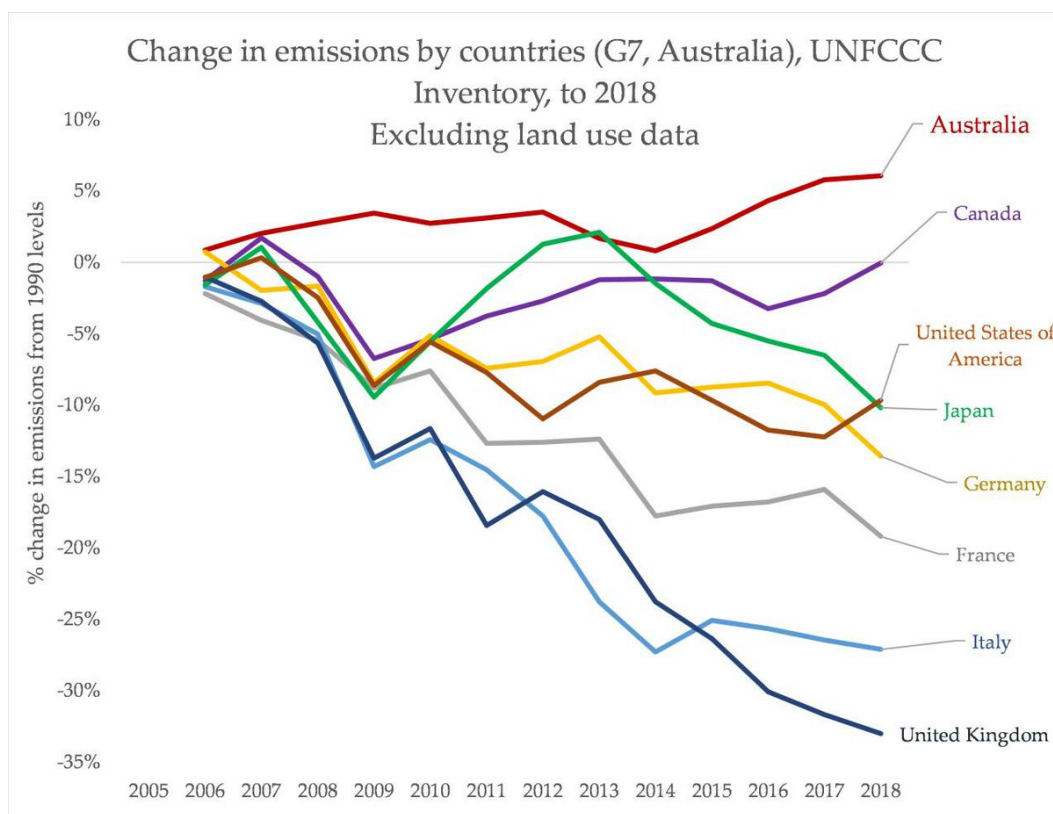

"No. Our job is to hold them to account," he said.

## Australia vs G7, world, fossil share

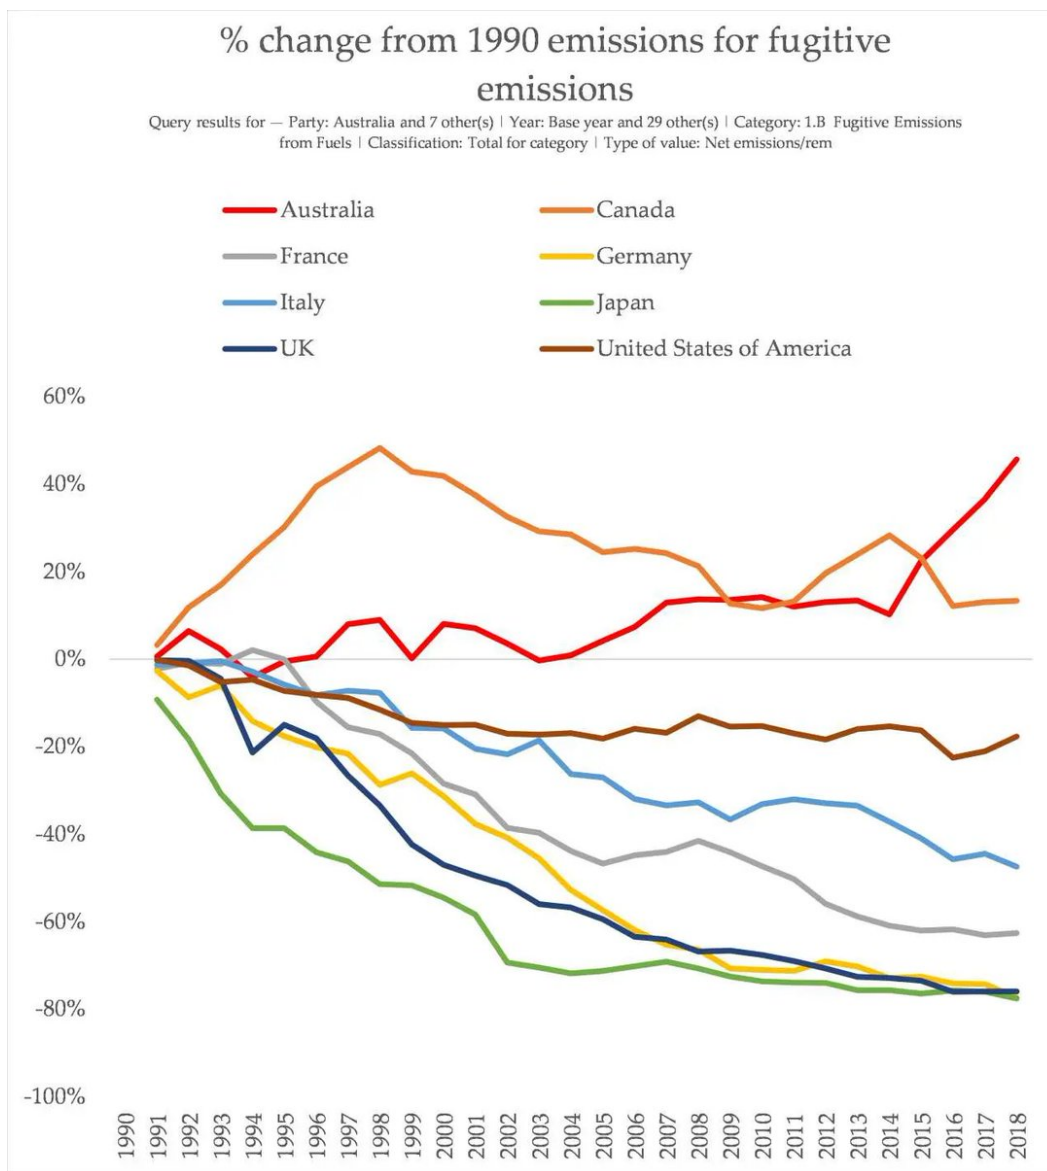

Ember 2021 Global Electricity Review - (Coal, oil, gas)

## % change from 1990 emissions for transport

Query results for — Party: Australia and 7 other(s) | Year: Base year and 29 other(s) |  
Category: 1.A.3 Transport | Classification: Total for category | Type of value: Net  
emissions/removals | Gas: Aggregate GHGs

## GREENWASHING

To illustrate this another way - check out the comparison between Australia and Canada, depending on whether you include 'land use' data (again: you shouldn't - you can't cram carbon from underground into trees and soils)

**Ketan Joshi**  @KetanJ0 · Dec 20, 2021

Replying to @KetanJ0

The other trick: they're including changes to land use, which comprise the vast bulk of Australia's "reductions".

This doesn't really count: carbon sucked into land is limited, isn't permanent, and doesn't cancel out carbon removed from deep underground.

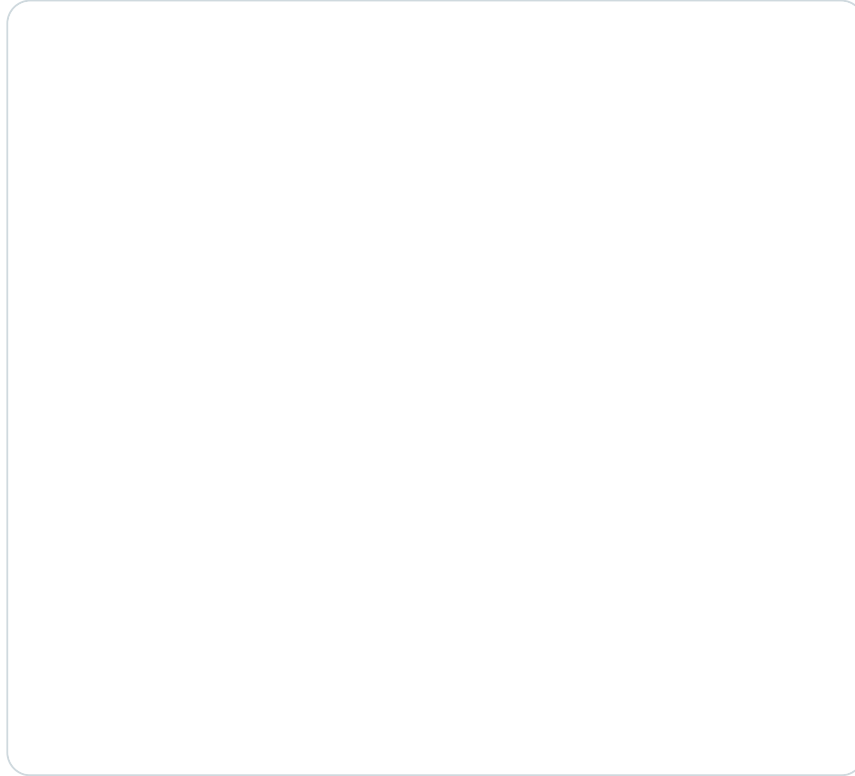

**Ketan Joshi** 

@KetanJ0 · [Follow](#)

Just to illustrate how significant this is - here's

Australia's changes vs Canada, with land use both excluded and included.

The narrative *\*completely\** changes for Aus, based on whether you decide to count something that really shouldn't.

## GREENWASHING

One key extra note on that is that MPs like [@KatieAllenMP](#) publish comparisons that use 2019 data for other countries, and 2020 data for Aus

Remember anything that happened in 2020, to the world's economies and societies? So, so dodgy.

**Ketan Joshi**  @KetanJ0 · Dec 20, 2021

I wish I had time to tear this apart properly because it's a near-perfect example of how the Aus gov't very

consciously and actively puts real effort into lying about their climate record to their voters.

But....here's a few 'lil points for you.

**Robbie D** 🌈🇦🇺🇮🇹🇫🇷 @robbieolive1

This came in my letterbox today from my local MP. WTF?! "Lowering emissions the Australian Way" - what does that even mean?! 🙄 Well, this is going straight into the recycling bin. lol

**Ketan Joshi** ✓

@KetanJ0 · [Follow](#)

The key visual element is this chart.  
@KatieAllenMP is actively exploiting a pandemic that's killed millions here, by presenting 2020 data for Aus (lower due to restrictions), and 2019 for everywhere else.

This is just.....extremely gross.

10:55 AM · Dec 20, 2021

♡ 308    💬 Reply    🔗 Copy link

## GREENWASHING

They keep claiming a 20% drop in emissions. Mostly achieved by wrongly including land carbon, the rest = claiming credit for drought, disease and renewable schemes Labor implemented.

**Ketan Joshi**  @KetanJ0 · Feb 3, 2022

Replying to @TimWilsonMP @danilic and 2 others

No, you're failing badly. GHGs up ~2% from 2005 levels. The most significant dip came entirely from the impacts of a deadly pandemic

If you incorrectly include land use (technology or taxes? lol), it's still only 16% (you say 20% because that's old data that sounds better)

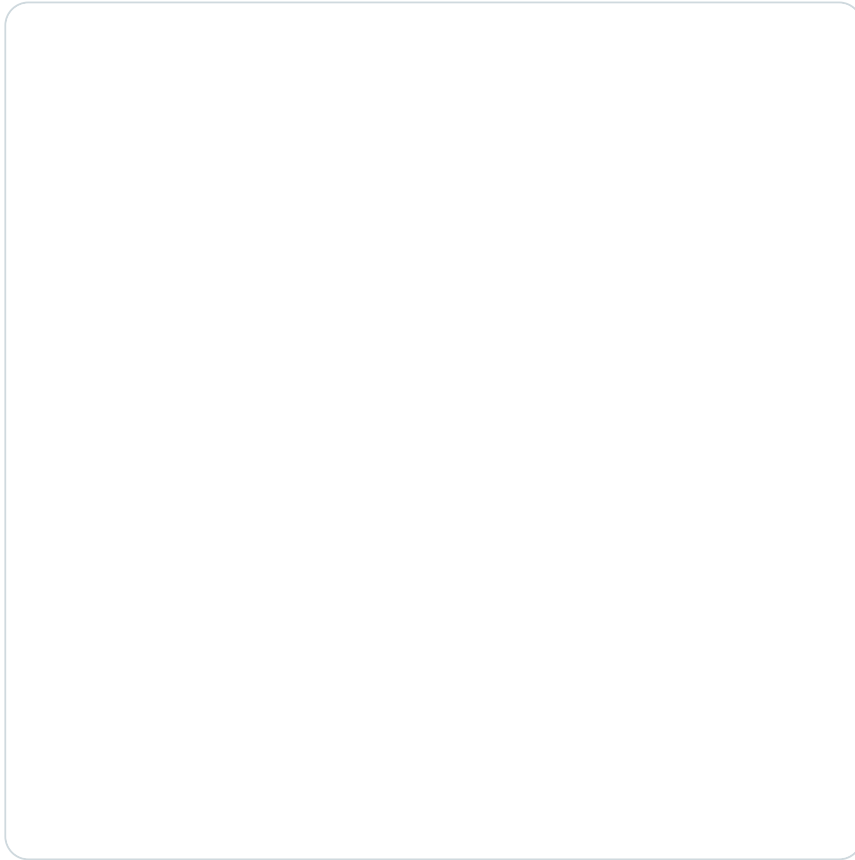

**Ketan Joshi** 

@KetanJ0 · [Follow](#)

All of that 20% comes from

- Mostly land use changes
- The Labor party's RET, which you openly wanted to axe
- Drought
- Pandemic

Your only actions were to \*weaken\* that drop, by enabling worse emissions from coal/gas mining and combustion vehicles.

## FOSSIL EXPANSION

Every single quarter since 2005 has seen a rise in Australia's emissions, except mid-2020 to mid-2021, due to the pandemic. Excluding that, rising coal/gas mining and worsening transport emissions have cancelled out growing renewables.

## Changes in Australia's emissions (excluding land use)

DISER Sep 2021

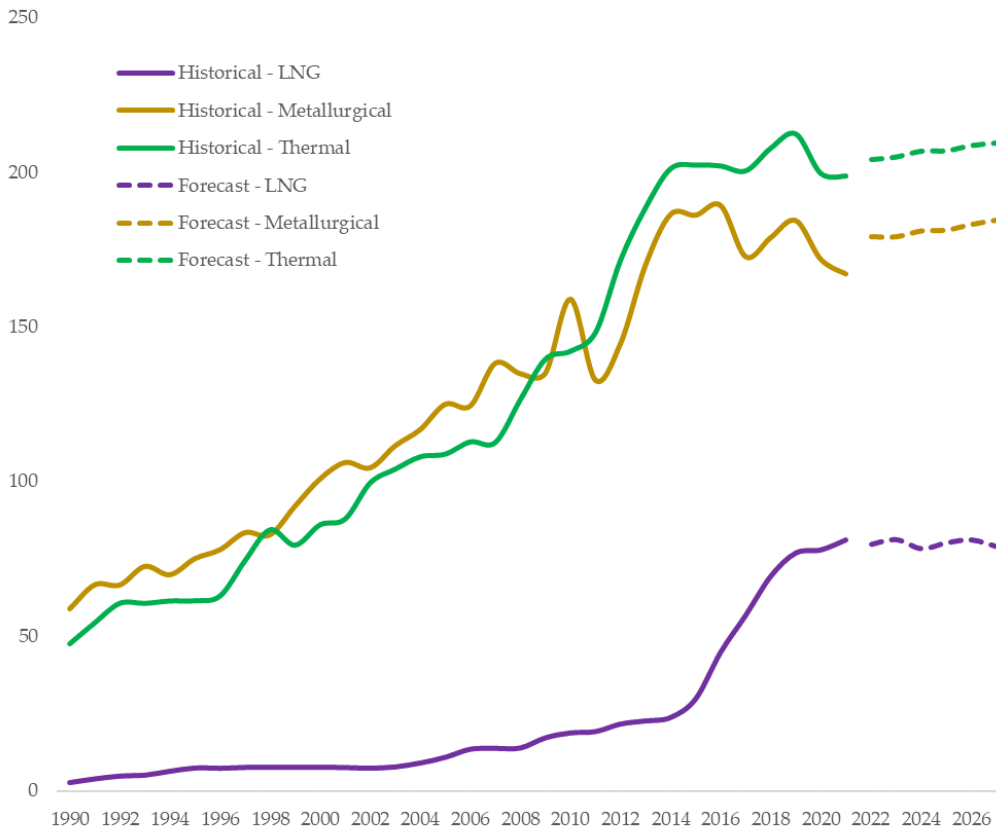

## FOSSIL EXPANSION

Those fossil mining projects - wrecking domestic emissions accounts - are also being exported and are burned. 2019 - 2021 = ~3,500 MTCO<sub>2</sub>. Comfortably more than double domestic emissions.

Aus punches above its weight when it comes to causing climate disasters.

Historical and forecasted fossil fuel exports  
Australia, Liquefied gas, Metallurgical coal, Thermal coal  
Department of Industry, Resources and Energy Quarterly, March 2022, megatonnes

## FOSSIL EXPANSION

Ties in w/ greenwashing: hydrogen made from fossil fuels = a new demand source. But Aus' gov't just has to do the filthiest, nastiest version of it. My thread below + [@CA\\_Latest](#) -> [.climateanalytics.org/media/australi...](https://climateanalytics.org/media/australi...)

## FOSSIL EXPANSION

"Climate inaction" is a phrase I've tried to remove from my content. These people are actively accelerating climate destruction. They're good at this.

"Australian fossil fuel subsidies surge to \$11.6 billion in 2021-22"  
([australiainstitute.org.au/post/australia...](https://australiainstitute.org.au/post/australia...))

## FOSSIL EXPANSION

And then, after using a deadly pandemic to justify worsening climate change, the government has been using a deadly war to justify worsening climate change. ([theguardian.com/australia-news...](https://theguardian.com/australia-news...)) That's it for fossil expansionism today. Tomorrow, actively delaying the transition and stymying progress. Please let me know if I've missed anything out so far!

Happy Thursday, my loves. Today's lesson will be about actively delaying emissions reductions, partic when some inherent momentum has been created towards change (eg, cheap renewables, or nascent investor rejection of high-emitting companies)

The Australian's Dr Jennifer Oriel says it's important to have a "slow transition" to renewable energy to achieve net zero.

skynews.com.au

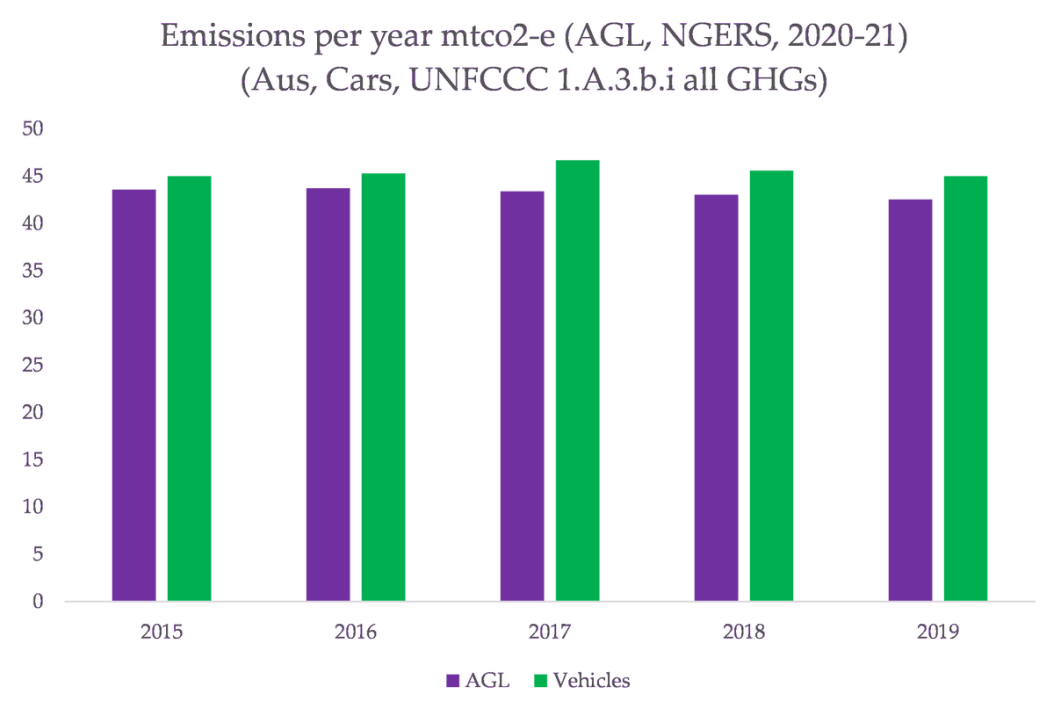

'Transitioning timing' to renewable energy is 'really important'

The Australian's Dr Jennifer Oriel says it's important to have a "slow transition" to renewable energy to achieve net zero. Dr Oriel said it is "inevitable" there will be a ...

DELAY

Remember that time [@JoshFrydenberg](#) tried to get the boss of [@AGLAustralia](#) sacked because Frydenberg was worried he wanted to reduce emissions too much?

Now, AGL is still pumping out roughly as much emissions as ALL AUSTRALIA'S CARS  $\backslash\_(\text{ツ})\_/\_$   
([thesaturdaypaper.com.au/news/politics/...](https://thesaturdaypaper.com.au/news/politics/...))

DELAY

Angus Taylor straight-up just pushed out a blatantly bullshit \$560 bill increase figure for Labor's climate policies, and it got repeated across media outlets (with a few notable exceptions being critical / scrutinising the claim) ([abc.net.au/news/2022-05-1...](https://abc.net.au/news/2022-05-1...)).

(^^ Still no modelling released, btw - I might have something for y'all on this in the coming days though, lol)

DELAY

At COP25, Aus shoved a massive crowbar in the spokes of negotiations so it could retain the right to use the aforementioned dodgy carryover cheat to fake action.

1 year later, they decided to not use it anyway. Fucking hell

Fuck

ing

hell ([theguardian.com/environment/20...](https://theguardian.com/environment/20...))

DELAY

Scott Morrison literally explained with his actual hands that he plans to go as slowly as possible in the near-term on emissions, and then hope for a magical last-minute sprint.

No secrets here. He's literally saying it out loud. Thread:

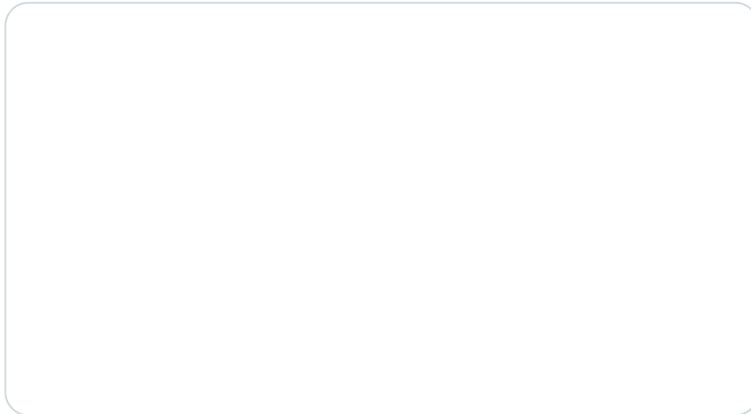

Ketan Joshi   
@KetanJ0 · [Follow](#)

Still catching up on everything I missed last week. This one is REALLY important: Aus is setting up to "backload" its emissions reductions. That is: set a net zero target, but lump all the work 2045-2050

Morrison said this very clearly and directly:

[pm.gov.au/media/press-co...](https://pm.gov.au/media/press-co...)

9:46 AM · Apr 28, 2021

[Read the full conversation on Twitter](#)

♡ 134    💬 Reply    🔗 Copy link

[Read 18 replies](#)

Just to be clear: he doesn't actually 'hope' for a last minute sprint, he hopes to be either dead or forgotten by the time the consequences of this decision become clearly publicly understood as linked to the decision. Sorry to dwell on this, but again, he drew it in the air in front of his actual face, yet somehow this still gets treated as some sort of non-existent, unknowable mystery that can never be included in reportage on this issue

0:00 / 0:17

"Hello, I'm going to delay climate action"

"SCOTT MORRISON SETS NET ZERO TARGET. IS TODAY THE DAY HE BECAME PRIME MINISTER. A STEP IN THE RIGHT DIRECTION. ON THE INSIDE HE WANTS TO DO THE RIGHT THING"

"Sorry, no, I'm going to go as slow as possible"

"SCOTT MORRISON: MODERATE"

DELAY

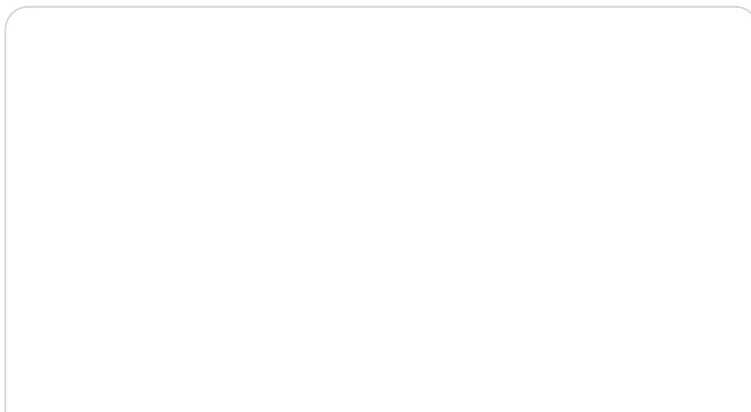

The Gorgon CCS failure is globally significant, in how it wasted funds that could've been spent on actual emissions reductions and funnelled it to fossil execs instead.

This flagship sunk seconds after it hit the water

**Ketan Joshi**  @KetanJ0 · Nov 2, 2021

Here's Australia's cumulative CO2 emissions from 1959 onwards, vs the total amount avoided through the use of carbon capture:

**Richie Merzian** @RichieMerzian

Taxes for technology

@AngusTaylorMP @SantosLtd at your Aus pavillion

Spruiking the colossal failure of CCS which Taylor has fastracked to earn Aussie carbon credits paid for by taxpayers

#cop26 🧑

**Ketan Joshi** 

@KetanJ0 · [Follow](#)

Chevron owns the Gorgon plant, the biggest CCS project in Aus and among the biggest project in the world.

The red strip here is emissions avoided by the plant, compared to Chevron's total actual emissions they are responsible for as a company.

## DELAY

Angus Taylor tried desperately to implement a “coalkeeper” scheme, which incentivises coal plants to stay open as long as possible. Designed to counteract the forces of renewable energy reducing wholesale prices. Literal delay. Very evil. ([reneweconomy.com.au/no-big-bang-as...](https://reneweconomy.com.au/no-big-bang-as...)) DELAY

Angus Taylor’s long-running campaign to force AGL to keep Liddell open was abandoned.

Purely out of hurt feelings, they dedicated a pile of taxpayer’s money to building a fossil gas power station that isn’t needed. ([reneweconomy.com.au/crony-capitali...](https://reneweconomy.com.au/crony-capitali...)) That’s it for today, but again, I’m so sure I’ve missed things so for this or any previous section please let me know!

An update on the fossil hydrogen bit, too:  
([canberratimes.com.au/story/7743700/...](https://canberratimes.com.au/story/7743700/...)).

A quick summary of the greenwashing bit, from my TikTok  
([tiktok.com/@ketanj0?lang=...](https://tiktok.com/@ketanj0?lang=...)).

---

0:00 / 1:23

Last day folks. Election is tomorrow. The final section is just the nasty stuff. The wasteful, egregious, batshit, cruel and shameless stuff. The salt in the wound. The high fives when scrapping carbon pricing. The Great 3-year Smirk.

NASTY

At a [@QRCouncil](#) dinner in late 2019, [@C4KylieM](#) asked [@ScottMorrisonMP](#) about the GBR's fate, and Aus' fossil mining.

The audience of rich, wine-soaked fossil fuel executives loudly booed her. Scott Morrison smiled. ([ketanjoshi.co/2019/11/01/coe...](https://ketanjoshi.co/2019/11/01/coe...))

## Scott Morrison says no evidence links Australia's carbon emissions to bushfires

PM suggests Australia could increase emissions without worsening current fire season, and says government finalising plans to crack down on environmental protests

Paul Karp

@Paul\_Karp

Wed 20 Nov 2019 23:43 GMT

It is this moment - the disaster, and his own and his party's response - that ties together the past three years of greenwashing, fossil expansion and delay / obstructionism.

Scott Morrison saw Australians getting hurt, and then set his mind to enabling them being hurt more. The Coalition party, and Scott Morrison and Angus Taylor, aren't just dodgers of responsibility. They are active threats.

They put whatever sparks of energy they have left towards making cost of living, physical disasters and disorganised transition risk much worse, immediately. Do not vote for these people. They are single-minded, and maniacal, and they'd happily see us all erased if it meant extending their material comforts and fossil industry friendships for another half-minute.

The end 💕

(will add in appendices with everything I've forgotten)

I keep remembering various horrors of the past 3 years I forgot to add to my thread. This was a big one. The 2019 election attack campaign against EVs and Labor's fuel policies? Morrison just...denied it ever happened. Which is pure madness.

"I didn't. That is just a Labor lie. I was against Bill Shorten's mandate policy trying to tell people what to do with their lives, what cars they were supposed to drive and where they could drive them." Scott Morrison denies he campaigned against EVs at the last election. #auspol

against EVs at the last election. #auspol

That whole thing was just stunning. The Energy and Emissions Reductions Minister had his dweeby young-lib staff shitposting sad little memes (ironically pre-empting modern day Elon Musk). The Coalition went on to win that election.
